**SECTION 1 -- MESSAGE TO CJIS SYSTEMS OFFICERS**

Section 2.1 contains information on the modification of the time frame of state records when an online expungement is sent to the III system.

Section 2.2 provides information on the expansion of the III Sealing Program to allow states to seal an arrest cycle at the national level.

Section 3 furnishes updates to the *NCIC 2000 Code Manual*.

\* \* \* \* \*

Users are reminded that any questions concerning the *NCIC 2000 Operating Manual*, the *NCIC 2000 Code Manual*, or the distribution of TOUs should be directed to the Crime Statistics Management Unit at (304) 625-4995.

TOUs are also available via the Internet on the Law Enforcement Online (LEO) at [www.leo.gov/lesig/cjis/cjis\\_pub/programs/ncictous.html](http://www.leo.gov/lesig/cjis/cjis_pub/programs/ncictous.html). Users with questions concerning access to the LEO should contact the LEO Program Office at (888) 334-4536 or via e-mail at <[leoprogramoffice@leo.gov](mailto:leoprogramoffice@leo.gov)>.

## SECTION 2 -- SYSTEM CHANGES

### 2.1 MODIFICATION OF THE TIME FRAME FOR SUPPRESSION OF STATE RECORDS WHEN AN ONLINE EXPUNGEMENT MESSAGE IS SENT TO THE INTERSTATE IDENTIFICATION INDEX (III) SYSTEM

AFFECTED BY CHANGE:

III

EFFECTIVE DATE:

September 7, 2008

#### Background

During the Spring 2008 round of CJIS Advisory Policy Board meetings, the FBI's CJIS Division advised that it was extending the record suppression period when III receives a Delete Record SID (DRS) deletion message from 30 days to 60 days. This extended time frame will minimize the occurrence of record reactivations by providing adequate time for III states to submit expungement/purge documentation to the FBI's CJIS Division, and for FBI's CJIS Division staff to process the documentation.

#### System Change

No system changes are necessary at the state level.

#### Manual Change(s)

Additions to Chapter 5 of the *III/National Fingerprint File (NFF) Operational and Technical Manual* (December 2005) are indicated by highlighting, and deletions are indicated by ~~strikeout~~.

**QUICK REFERENCE****UNSOLICITED MESSAGES**

Message Key	Purpose	Location
\$.A.REA	Reactivation Message After <del>30</del> 60 Days of DRS Receipt	Chap. 5 Sec. 4.7 Pages 15-16

**CHAPTER 5 - MAINTAINING RECORDS****SECTION 4 -- DELETING STATE RECORDS INDEXED IN THE III  
(DRS DELETION MESSAGE)****4.1 DRS DELETION MESSAGE - INTRODUCTION**

**IMPORTANT NOTE:** The DRS deletion message is used to initiate expungement of a state's *entire* record that is in the III. It is not used for partial expungement, i.e., the record contains an arrest cycle(s) that is *not* to be expunged.

To assess whether transmittal of a DRS message is appropriate, a state must review a subject's arrest(s) cycles that are in the III for that state to determine if expungement of the entire record is desired. To accomplish this, a state(s) must perform a QR (record request) Purpose Code A (administrative) to obtain this information prior to transmitting a DRS message.

To request expungement of a single arrest cycle(s) in a multi-cycle record, states must not transmit a DRS message but submit written documentation to the FBI's CJIS Division to confirm the partial expungement.

Whenever a state record ceases to exist due to a court-ordered expungement or a purge, the state must remove its SID Number from the III, and submit written documentation to the FBI's CJIS Division to expunge all arrest cycles from the III record, and any other associated data. The MKE to be used in these instances is the DRS. The DRS deletion message flags the state's SID Number as expunged, places a "pending expungement" flag on the state's active DOAs, and stops dissemination of the state's data based on either a III query, fingerprint submission, and/or document processing for ~~30~~ 60 days. It is suggested that the III state expunge their state record upon receipt of the unsolicited message EXP or EXS from the III.

The state must submit expungement/purge documentation promptly. If the FBI's CJIS Division does not receive the documentation within ~~30~~ 60 days of a state's DRS deletion message, the state's data in that record will be reactivated. The III will send a \$.A.REA

unsolicited message advising the state that the record has been reactivated and the “pending expungement” flag removed. The III will substitute an active FBI pseudo-pointer for the state’s expunged SID Number. When this happens, the FBI’s CJIS Division will provide the state’s data for record requests. The state must transmit an MRS modification message to re-establish the SID Number in the III in order to expunge the record. Additionally, the state must transmit a new DRS deletion message.

When a state transmits a DRS deletion message in error, it can use an MRS modification message to reactivate the SID Number (e.g., remove the expungement flag from the SID Number and the “pending expungement” flag from the appropriate DOAs). The MRS modification message must contain the individual’s date of birth as the record identifier preceding the FBI Number. (Section 1 of this chapter furnishes the format for the MRS modification message.) After the III receives the MRS modification message, the III reviews its record to ensure that at least one criminal arrest fingerprint submission is on file for the state before removing the expungement flag from the SID Number and transmitting the “accept” message with the appropriate \$.A.SSO or \$.A.MSO message. If the review reveals that there are no data in the record for the state, the MRS modification message will be rejected as “NOT AUTHORIZED.”

In the event the FBI’s CJIS Division expunges a state’s record based on the receipt and processing of expungement documentation from the state (i.e., the state does not transmit a DRS deletion message), the FBI’s CJIS Division will remove the SID Number and the III will advise the state of this action automatically by the transmission of either a \$.A.EXP or \$.A.EXS unsolicited message. (Subsection 4.5 of this section provides the format for the \$.A.EXP and \$.A.EXS unsolicited messages.)

A state must not remove its SID Number when it does not intend to submit documentation to the FBI’s CJIS Division or when the state chooses not to support the record. In these cases, the state should use an MRS modification message to modify its SID Number to an FBI pseudo-pointer.

### **4.3 DRS DELETION MESSAGE PROCESSING**

The III processes DRS deletion messages as follows:

1. If the record is single-source, the DRS message will cause:
  - A. The SID Number to be flagged as expunged.
  - B. The placement of a “pending expungement” flag on the state’s active DOAs.
  - C. The transmission of a \$.A.EXP (FBI Number Expunged) message to the state after the FBI’s CJIS Division processes the associated expungement documentation.

During the ~~30-day~~60-day wait period, III inquiries by FBI Number will result in a “2L01” type response (RECORD NO LONGER ON FILE - EXPUNGED) and will include the date of the DRS deletion message as the date expunged. Responses to fingerprint submissions and/or document processing will suppress the state’s data. Inquiries using the expunged SID Number will result in a “no record” response because inactive SID Numbers are available only for audit (synchronization) purposes.

Upon receipt of the proper documentation, the FBI’s CJIS Division will expunge the state’s data. As mentioned previously, if for any reason the FBI’s CJIS Division does not receive the documentation within ~~3060~~ days of a state’s DRS deletion message, the state’s data in that record will be reactivated. The III sends a \$.A.REA unsolicited message advising the state that the record has been reactivated and the “pending expungement” flag removed. An active FBI pseudo-pointer will be submitted for the state’s expunged SID Number. The FBI’s CJIS Division will provide the state’s data for record requests in lieu of the state.

2. If the record is multi-source, the DRS deletion message will cause:
  - A. The SID Number to be flagged as expunged.
  - B. The placement of a “pending expungement” flag on the state’s active DOAs.
  - C. The transmission of an unsolicited \$.A.EXS (SID Expunged) message to the state after the FBI’s CJIS Division processes the associated expungement documentation.

During the ~~30-day~~60-day wait period, the state’s data will be suppressed from responses to III inquiries by FBI Number and fingerprint submission and/or document processing. Inquiries using the expunged SID Number will result in a “no record” type response. If the proper documentation is not received within the required ~~3060~~ days, the state’s pointer will be reactivated as an FBI pointer.

#### **4.7 \$.A.REA UNSOLICITED MESSAGE - REACTIVATION MESSAGE AFTER ~~3060~~ DAYS OF DRS RECEIPT**

Whenever a state transmits a DRS deletion message and it does not submit an expungement notice to the FBI’s CJIS Division within ~~3060~~ days of the DRS deletion message, the FBI will reactivate the III record. Each day, the III identifies records containing SID Numbers that were expunged more than ~~3060~~ days prior to the current date and for which the FBI did not receive the corresponding expungement notice. Once the record is reactivated, the FBI provides the CHRI contained in the FBI’s database in place of the state record.

##### **4.7.1 \$.A.REA UNSOLICITED MESSAGE FORMAT**

A \$.A.REA unsolicited message will be transmitted by the III when the FBI’s CJIS Division does not receive documentation within ~~3060~~ days of a DRS deletion message.

The \$.A.REA unsolicited message substitutes an active FBI pseudo-pointer (e.g., PA\*\*123056) for the state's SID Number, and the FBI's CJIS Division provides the CHRI until the state determines if the record is an actual expungement from the state's files. The following text provides the format and an example of a \$.A.REA unsolicited message. This message is used to notify a state when the III reactivates suppressed records.

**Message Format:**

**\$.A.REA.SID/(3-10 characters).FBI/(1-9 characters).RECORD REACTIVATED**

**Example:**

\$.A.REA.SID/PA12345678.FBI/9000006.RECORD REACTIVATED

## **2.2 EXPANSION OF THE INTERSTATE IDENTIFICATION INDEX (III) SEALING PROGRAM FOR A SINGLE ARREST CYCLE**

AFFECTED BY CHANGE: **III**

EFFECTIVE DATE: **January 11, 2009**

### **BACKGROUND**

In 1993, the FBI's CJIS Division implemented a III system change providing National Fingerprint File (NFF) states the ability to seal a state-maintained record in the III. In September 2008, the FBI expanded the Sealing Program to any III state with statutory authorization or requirement to seal an entire criminal history record for a specific purpose(s).

**The following should be added as Section 6 in Chapter 7 of the *III/NFF Operational and Technical Manual (December 2005)***

### **SECTION 6 -- SINGLE CYCLE SEALING**

#### **6.1 INTRODUCTION**

The next phase of the III Sealing Program is the sealing of a single arrest cycle by III participating states only. A single arrest cycle is defined as one date of arrest that contains one or more arrest charges. Operationally, a new message key, Seal Record Cycle (SRC), will be introduced for the purpose of sealing an arrest cycle. The format of the SRC message will allow states to seal an arrest cycle based on the date of arrest (DOA) and the arresting agency's Originating Agency Identifier (ORI). For arrest cycles with the same date of arrest value, the arresting agency ORI will be used to distinguish the correct arrest cycle to be sealed. If a correlation cannot be made to the correct arrest cycle, all arrest cycles of the same DOA and ORI value will be sealed. To qualify for sealing, the entire arrest cycle must be eligible for sealing.

Prior to participation in single-cycle sealing, the III state must coordinate with the FBI's CJIS Division to submit the SRC maintenance message to seal an arrest cycle that is not available for dissemination for a specific purpose(s). The scheduling of a III software change to allow the state to electronically seal a single arrest cycle requires 6 months advance notice. There are no limitations on the number of arrest cycles that can be sealed by a state. However, for each sealed cycle, the state must submit a separate SRC maintenance message. States will be able to set a seal flag for a single arrest cycle within state-maintained records only. When all arrest cycles from a sealing state have been sealed in the record, the III will automatically set the seal flag in the pointer to indicate that the entire record is sealed. The pointer will remain sealed until new activity takes place in the

record, i.e., arrest, want, or Sex Offender Registry (SOR), at which time the seal flag in the pointer will be reset to indicate the record is no longer sealed. However, the individual arrest cycle(s) will remain sealed. Partial sealing of a cycle, i.e., the arrest cycle has five charges and only two of the charges qualify for sealing, may not be accomplished via the SRC; the message will be rejected. Instead, the state must send in documentation to request the expungement of the two charges.

## 6.2 SYSTEM DESIGN

- The Single Cycle phase of the Sealing Program will be applicable only to III participants.
- A III state will have to make software changes to enable them to electronically seal single arrest cycles via the new III message key.

The III Single Cycle Sealing system design sets flags in an arrest cycle when the criminal history information in an arrest cycle is not available for dissemination for a specific purpose code(s). This design incorporates two flags into the system. The FBI and the Sealing Program participants use the flags to maintain the status of the arrest cycle; however, the flags are not visible to the requesting states. The seal flags are:

Y- Indicates the state's criminal history information in a cycle is sealed

N- Indicates the state's criminal history information in a cycle is unsealed

The III Sealing Program participant uses the SRC maintenance message to set a seal value of "Y" whenever the III has an arrest cycle which contains criminal history information that is unavailable for dissemination for a specific purpose code(s). The Sealing Program participant sets a seal value of "N" when the sealed arrest cycle is now available for dissemination for all purpose codes. The FBI provides a data field in this system design for use in an update transaction for setting or deleting the seal flag. The Seal Field (SEL) will be followed by a "Y" or an "N."

### III Seal Record Cycle (SRC) Message Key

A III state that is participating in the III Sealing Program may send the SRC Message Key (MKE) to III to seal a single arrest cycle within a state-maintained III record. The III will generate an SRC Accept message or generate an established multiple line reject message, as appropriate. The SRC MKE and Accept message formats are shown below.

#### **Sample SRC MKE:**

```
2L01HEADERXXXX01234.SRC.MD1012600.MD01087845.9009000.ORI/MDBPD0000.  
DOA/19941229.SEL/Y
```

**SRC MKE Message Format**

**2L01HEADERXXXX01234** (19 characters).**SRC** (3 characters).**MD1012600** (9 characters).**MD01087845** (3 - 10 characters).**9009000** (1 - 9 characters).**ORI/MDBPD0000** (9 characters).**DOA/19941229** (8 characters YYYYMMDD format).**SEL/Y or N** (1 character)

**Explanation:**

<b><u>Message Segment</u></b>	<b><u>Field</u></b>	<b><u>MFC</u></b>
2L01HEADERXXXX01234	Header	---
SRC	Message Key	---
MD1012600	Designated State Agency Identifier	---
MD01087845	SID Number	---
9009000	FBI Number	---
MDBPD0000	Arresting Agency Identifier	ORI/
19941229	Date of Arrest	DOA/
Y or N	Seal Status	SEL/

**SRC Accept**

KL01HEADERXXXX01234  
MD1012600  
ACCEPT SRC FOR SID/MD01087845 FBI/9009000 DOA/19941229

**6.3 RECORD RESPONSE PROCESSING****Responses Resulting from Fingerprint Submissions**

Currently, when a fingerprint submission identifies to a non-NFF state-maintained record, the FBI responds with the FBI Identification Record. When a fingerprint submission is identified with a single source record that contains a single sealed cycle and thus the sealed flag is set, the FBI's CJIS Division will not respond for the exempted sealing purpose; instead the FBI's CJIS Division will send the fingerprint contributor a NO RECORD (non-identification) response. If the seal flag is not set, (record has multiple arrest cycles, sealed

and unsealed), the FBI's CJIS Division will respond with the FBI Identification Record containing only the unsealed arrest cycles.

### Terminal Inquiries

When an authorized agency forwards a QH name inquiry to the III for a record that contains a single sealed cycle and the SEL flag of "Y" is set, and the purpose of the inquiry is for an exempted sealing purpose, the III will not inform the inquirer of the existence of a sealed record. For a single source record, the III will send the inquirer a NO IDENTIFIABLE RECORD ON FILE response. For multi-source records, the III will identify only those states that will disseminate the record information for the purpose requested.

### Example:

```
2L0112345XXXXHEADER.QH.MO0000001.FBI/9022000.PUR/I.ATN/TEST.
```

### Response:

```
NL0112345XXXXHEADER
MO0000001
NO IDENTIFIABLE RECORD IN THE NCIC INTERSTATE IDENTIFICATION INDEX (III)
FOR FBI/9022000.PUR/I.
```

When an authorized agency forwards a QR record request to the III for a record that contains a seal flag and the purpose of the request is for an exempted purpose, the III will not send a \$.A.CHR message to the sealing state. If the record is single source, the III will respond with a NO IDENTIFIABLE RECORD ON FILE response. For multi-source records, the III will send a \$.A.CHR message only to the holding state(s) that will disseminate the record information for the purpose requested.

## 6.4 INITIAL SETTING AND MAINTENANCE OF SEAL FLAGS

Under the III Sealing Program, the FBI's CJIS Division sets the SEL flag value to "N" to indicate that the arrest cycle(s) in a record in the III (newly established or updated) is available for dissemination. The sealing state must transmit the SRC maintenance message to indicate an arrest cycle is not available for dissemination.

Programming changes will need to occur at the state identification bureau to allow for use of the SRC maintenance message to set sealing flags. To initially set SEL flags in the III to restrict the dissemination of a sealed arrest cycle, **the state may submit a computer medium of SRC maintenance messages.** States anticipating becoming a sealing participant should notify the III staff at least 6 months in advance to advise the FBI's CJIS

Division for which purpose code(s) the sealed cycles can be disseminated. The FBI's CJIS Division must modify a software code table to identify a state as a participant and the purpose code(s) for which the sealed cycle may be disseminated. If a state attempts online sealing transactions before the software change is made, the following single line reject message will result:

"REJECT ORIGINATING AGENCY IS NOT A SEAL PARTICIPANT"

After the III sets the initial flag, the state may seal an arrest cycle with an online SRC maintenance message. A III state will be allowed to set a flag in any cycle of a record that contains its State Identification Number (SID); however, in each case, the III state should ensure that the entire arrest cycle, not just part of it, is eligible for sealing. The III state must use an SRC maintenance message to set the SEL flag in its arrest cycle. The SRC maintenance message must contain a header, message key (SRC), state bureau ORI, SID, FBI Number, arresting agency ORI, DOA, and SEL/Y.

The following SRC message format must be used to set and delete SEL status flags. An example of the FBI's response to this type of message is also included.

**Example:**

```
2L01HEADERXXXX01224.SRC.MD1012600.MD81331911.9015174.ORI/MDBPD0100.
DOA/20060201.SEL/Y(EOT)
```

**Response:**

```
KL01HEADERXXXX01224
MD1012600
ACCEPT SRC FOR SID/MD81331911 FBI/9015174 DOA/20060201
```

Once the III state sets the SEL flag in the arrest cycle, the state may delete the flag by using another SRC maintenance message. To cancel a flag using the above example, the state must use an SRC maintenance message and change the "SEL/Y" to "SEL/N."

## 6.5 ADDITIONAL SYSTEM ATTRIBUTES

**With this TOU, the SEL/ Y is being redefined to indicate the entire record is sealed or one or more arrest cycles are sealed.**

### (1) QR Purpose Code A Inquiry

The response to the QR inquiry for Purpose Code A will display all of the arrest cycles in the III for the requesting state. If an arrest cycle(s) is sealed, the wording "**SEALED ARREST CYCLE**" will be displayed on the first line after the cycle number.

---

**(2) ZI Responses**

Under the Sealing Program, the III will display a seal value of “Y” or “N” after the IFS (Identification for Firearm Sales) flag in positive ZI responses for each sealed or unsealed record. The seal value will indicate there is or is not sealed data in the record. An example of this message follows:

```
9L01HEADERXXXX01234
DCFBIAA2
IDENTIFICATION SEGMENT III RECORD OF FBI/9015174 1995/03/11

```

BASED ON FBI NUMBER ONLY

THIS RECORD CAN BE USED FOR ADMINISTRATIVE PURPOSES ONLY AND CANNOT BE  
DISSEMINATED FOR ANY OTHER PURPOSE.  
END

**(3) Consolidations and Sealed Records**

The III \$.A.CON (consolidation) interface message indicating the status of a record currently on file and the ACCEPT message in response to an MRS (Modify Record SID) message are modified to include the SEL Field.

When the FBI consolidates records, the records are merged into one and re-established in the III with an FBI maintained pointer. For this reason, any arrest cycle(s) that is sealed in either the retained or canceled record will be unsealed. A caveat will be appended to the \$.A.CON message. The caveat will advise the state(s) that the original records contained sealed arrest cycle(s). If the state wishes to reseal the arrest cycle(s), the sealing state must transmit the MRS message to assume control of the record in the III and then transmit an SRC maintenance message to reset the SEL flag to a “Y” status.

**Consolidation Message with Sealing Caveat:**

```
$.A.CON.SID/FL000013.FBI/9093399.NCIC III RECORD CONSOLIDATION
CANCEL.SID/FL0000235.FBI/9000600.SEAL FLAG DELETED. IF A REVIEW OF THE
```

CONSOLIDATED RECORD INDICATES THAT THE SEAL FLAG IS NECESSARY, SUBMIT EHN OR SRC TO SET SEALED FLAG.

#### **(4) Assuming/Relinquishing Control of a Sealed Record**

When a state submits an MRS message to assume responsibility of a record in the III, the III will respond with an ACCEPT message. For those states participating in the Sealing Program, the ACCEPT message will include the current SEL status for the record on the last line of the ACCEPT message.

##### **MRS Accept Message to Sealing Participant:**

```
KL01HEADER111101212
FL0370100
ACCEPT SID/FL123456 FOR FBI/9004500
III RECORD IS SINGLE-STATE
SEL/N
```

When a state submits an MRS message to relinquish responsibility of a record in the III, the III will respond with an ACCEPT message. For those states participating in the Sealing Program, the ACCEPT message will advise that the record originally contained a sealed arrest cycle(s)

##### **MRS Accept Message to Sealing Participant:**

```
KL01HEADER111101212
FL0370100
ACCEPT SID/FL123456 FOR FBI/9004500
III RECORD IS SINGLE-STATE
SEL/Y
```

#### **(5) III Synchronization Record Layout**

A provision of the III requires participating states to conduct biannual audits of their III records. The FBI provides a copy of the states' data in the III and current III status. The III synchronization file includes the SEL flag as one of the data elements for use by states participating in the Sealing program.

**As previously mentioned, the SEL/Y is being redefined to indicate the entire record is sealed or one or more arrest cycles are sealed.** The SEL status flag is designated in position 86 of the III synchronization record layout. The alphabetic character "Y" in this position identifies either the entire record or one or more arrest cycles are sealed or an alphabetic character "N" indicates neither the record nor the arrest cycle(s) are sealed. If the sealing state detects a discrepancy in the SEL status flag, the state should transmit a QR

## SECTION 2 -- SYSTEM CHANGES

---

record request with a Purpose Code "A" to review the III record. If only an arrest cycle(s) should be sealed, the sealing state should transmit an SRC maintenance message to seal the appropriate cycle(s). For those states not participating in the Sealing program, this position should be ignored when processing the synchronization.

**SECTION 3 -- NCIC 2000 CODE MANUAL UPDATES**

**GUN DATA CODES**

The following is a change to the *NCIC 2000 Code Manual*. Three firearm manufacturers have changed their names. The correction is to Section 1.5 MAKE FIELD CODES and Section 1.6 MAKE FIELD CODES ALPHABETICALLY BY CODE. The change is to the **Make, Brand, Model, or Trademark only**.

<b>Make, Brand, Model, or Trademark</b>	<b>Country</b>	<b>Code</b>	<b>Reference</b>
Leitner Wise Rifle Co.	US	LWR	Virginia
<b>changed to:</b> Land Warfare Resources Corp. (DBA-LWRC)	US	LWR	Name change
Sig Arms	US	SIG	
<b>changed to:</b> Sig Sauer	US	SIG	Name changed to align company with global brand
Fabrica Militar de Armas Portatilies (F.M.A.P.) AT		FAI	
<b>changed to:</b> Fabrica Militar Fray Luis Beltran AT	AT	FAI	Name change, previously a state- run military arsenal

**The following should be added to:**

**Section 1.5 MAK FIELD CODES ALPHABETICALLY BY MANUFACTURER**
